Android phone? What's up, thx for the article,
easesaver,kazaa and bittorrent may hamper me

from future updates. Q: How to take the
rounded corners of 3 jPanels into account? I
would like to have three panels that are aligned
to the right side of the BorderLayout. I would
like them to have their own width and take up
1/3rd of the space of their container. I have the
top/left borders aligned with a vertical- and
horizontal line, respectively. I have the following
code, but you can see that there is an annoying
gap to the right of the last panel. Here's a

screenshot to illustrate: import
java.awt.BorderLayout; import
java.awt.Dimension; import javax.swing.JFrame;
import javax.swing.JLabel; import
javax.swing.JPanel; import
javax.swing.JTextField; public class Test {
private JFrame frame; private JLabel label;

```
private JTextField textField; private JPanel panel;  
    private void displayGUI() { frame = new  
JFrame("Testing"); frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
```
